Alfalfa Hay & Pasture Mix

Alfalfa Hay & Pasture Mix is a very versatile mixture that combines the benefits of grasses and legumes in a single formulation. Alfalfa contributes one of the highest sources of protein available. Alfalfa and clover components draw Nitrogen from the air and return it to the soil for use by the grasses, reducing fertilizer requirements. The grasses in this mixture are selected to complement the maturity of the legumes.

- High source of protein
- Maturity of grasses and legumes allow for optimal nutritional quality whether grazed or taken for hay

Planting Rates:

30-40 lbs. per acre for new pastures; 10-20 lbs. per acre for over-seeding existing pastures.

Planting Times:

Best in early spring and early fall when weather is cooler and moisture is more reliable.

Use:

All states.

% of Mixture	Species	Suitable Soil Types			Establishment	Persistence	Drought Tolerance	Winter-hardiness	Palatability	Yield Potential	Grazing Tolerance
