MIXTURE SELECTION LEGEND

BEEF

DAIRY

SMALL RUMINANT

HORSE

HAY

EXCELLENT CHOICE

GOOD CHOICE

FAIR CHOICE

*The addition of legumes to grass mixtures enhances nutritional value and lowers fertility requirements. When selecting legumes for ruminant pastures, Bloat becomes a factor. Bloat is most common in animals that have a diet of more than 50% legumes; particularly alfalfa, ladino, red and alsike clovers. Red clover is not recommended for addition to horse pasture mixtures. Diseased red clover may cause Slaframine (slobbering in horses).

Forage First® Pasture Mix Selection Chart

Forage First® Pasture Mix	Characteristics	 Beef Pastures	 Dairy Pastures	 Small Ruminant Pastures	 Horse Pastures	 Hay	Planting Rates
All-Around	Excellent choice for grazing or hay production. Better forage quality than GrassMaster.	Excellent	Excellent	Excellent	Good	Excellent	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre
GrassMaster	Good choice for grazing, green-chop or hay production. More drought tolerant than All-Around.	Excellent	Excellent	Fair	Good	Excellent	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre
Mare & Foal	Promotes proper functioning of the equine digestive system. Better forage quality than Horse Country®. Contains no tall fescue.	Fair	Fair	Fair	Excellent	Good	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre
Horse Country®	Excellent palatability for horses. More drought tolerant than Mare & Foal. Contains endophyte-free tall fescue.	Fair	Fair	Fair	Excellent	Good	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre
Jump Start	Excellent choice for overseeding existing stands or short-rotation pastures. Provides early spring and fall forage.	Good	Good	Fair	Excellent	Good	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre
BLM #4	Very versatile mix that establishes quickly. Produces quality forage and handles traffic.	Good	Good	Good	Good	Good	New: 30-40 lbs/acre Overseed: 10-20 lbs/acre

Planting Times: Best in early spring and early fall when weather is cooler and moisture is more reliable.
