

**FORAGE FIRST™**  
WHEN YIELD AND QUALITY MATTER™

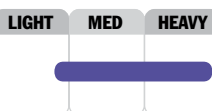

P R E M I U M  
*All-Around*  
P A S T U R E M I X

All-Around Pasture Mix is formulated with grass varieties to maximize production throughout the growing season. All-Around Pasture Mix is an excellent choice for grazing or hay production, and is well-suited for all types of livestock.

- Better forage quality than GrassMaster
- Tetraploid and diploid perennial ryegrass and timothy provide early spring production
- Endophyte-free tall fescue extends productivity into the hot, dry summer months
- Kentucky bluegrass provides sod-forming capability to help maintain a healthy stand
- Performs well in a range of soil and climate conditions
- Especially well-suited for wet, heavy soils

**SUITABLE SOIL TYPES**

**PLANTING RATE**

**new pastures:**  
30-40 lbs/acre  
**overseeding:**  
10-20 lbs/acre

**PLANTING TIMES**

Best in early spring and early fall when weather is cooler and moisture more reliable

**PLANTING ZONES**

Northern Tier States
