

**FORAGE FIRST™**  
WHEN YIELD AND QUALITY MATTER™

P R E M I U M  
**GrassMaster**  
P A S T U R E M I X

GrassMaster Pasture Mix is formulated to maximize production during the entire growing season. As with most grass mixtures, GrassMaster Pasture Mix will perform best with adequate rainfall or irrigation.

- More drought tolerant than All-Around
- Endophyte-free tall fescue and orchardgrass perform well in less-than-ideal summer conditions
- Ryegrasses provide early forage production
- Good choice for grazing, green-chop or hay production
- Performs well across a variety of soil and climatic conditions

%	SPECIES	ESTABLISHMENT	PERSISTENCE	DROUGHT TOLERANCE	WINTER-HARDINESS	PALATABILITY	YIELD POTENTIAL	GRAZING TOLERANCE

**SUITABLE SOIL TYPES**

LIGHT	MED	HEAVY
[Progress bar showing suitability from Light to Heavy]		

**PLANTING RATE**

**new pastures:**  
30-40 lbs/acre

**overseeding:**  
10-20 lbs/acre

**PLANTING TIMES**

Best in early spring and early fall when weather is cooler and moisture more reliable

**PLANTING ZONES**

Northern Tier States
